

STREAMLINE YOUR IT MANAGEMENT

The shift from traditional IT to modern IT starts now with Pointivity's System Server as a Service. Our hyper-converged infrastructure comes fully loaded with all seven modules of System Center 2016, and is installed effortlessly with preset configurations that connect, sync, and integrate with your existing network. You can leverage the hosted solution to keep ahead of technology issues and management.

Pointivity's System Center as a Service offering delivers the right technology in a simple and cost effective manner. Installed on Pointivity's hyper-converged infrastructure, System Center 2016 provides a simplified experience to keep you in control of your IT.

The hyper-converged infrastructure is fully managed by Pointivity and the monthly support of System Center is included which decreases the costs of maintaining IT and delivering critical functions and services.

The System Center as a Service offering satisfies a variety of industries and is customizable to meet your needs to reduce burden, risk, and cost while increasing speed of deployment. A monthly, pay as you go licensing model can deliver your System Center needs, workload requirements, and eliminate hardware worries, upgrade concerns and support issues when compared to the traditional deployment model.

BENEFITS OF System Center as a Service

All OPEX Model

No large upfront fees – Monthly costs are known and can easily be factored for budgeting purposes

Includes System Center Licenses & All 7 Modules

The full functionality of System Center 2016 is included from the start

Fully Managed & Supported

Reduces the risk and burden involved with deploying & managing System Center

Standard & Enterprise Editions

Both editions are available for deployment

Backup to Azure

Additional layer of protection as the entire deployment can be replicated to Azure Cloud

SYSTEM CENTER AS A SERVICE **Step by Step**

1 Assess	2 Sign Up	3 Deploy	4 Integrate	5 Customize
We will assess your System Center requirements to customize the deployment to meet your needs.	Upon acceptance of the deployment plan, just follow our simple sign-up process to initiate the project.	Depending on the options selected, setup of System Center 2016 will be delivered to your specifications.	Upfront project planning will define the integration into your existing network.	You can utilize our team to customize System Center 2016, ensuring you receive what you need.

What is included with System Center 2016

≡ CONFIGURATION MANAGER

Deploy software, protect data, monitor health, and enforce compliance across devices, including support for the latest Windows 10 features. Frequent updates, enhanced integration with Microsoft Intune, and a unified end-user portal make it easier to manage endpoints.

≡ VIRTUAL MACHINE MANAGER

Deploy and manage virtualized software defined datacenter with a comprehensive solution for networking, storage, compute, and security.

≡ ORCHESTRATOR

Automate datacenter tasks with Orchestrator or Service Management Automation. Create and execute runbooks using native Powershell scripts and workflows inside Windows Azure Pack or Powershell ISE.

≡ ENDPOINT PROTECTION MANAGER

Protects client and server operating systems against the latest malware threats. It is built on System Center Configuration Manager, giving a unified infrastructure for client security and compliance management. Offering is delivered with variable endpoint licensing costs.

≡ DATA PROTECTION MANAGER

Protect private cloud deployments and applications with ease. Protect VMs that Windows Server 2016 capabilities, such as Shielded VMs and Storage Spaces Direct. Replace tapes with cloud backup through native integration with Operations Management Suite.

≡ OPERATIONS MANAGER

Monitor health, capacity, and usage across applications, workloads, and infrastructure, including Azure and Office 365. Benefit from broader support for Linux environments, improved monitoring with management pack discoverability, data-driven alert management, and integration with Operations Management Suite for rich analytics and insights.

≡ SERVICE MANAGER

Use built in processes and automation for incident resolution, change control, and service requests. Increase efficiency with improved workflows, performance enhancements and user friendly self-service portal.

Why Pointivity?

Our experience has led to a one size fits one approach that ensures successful business wide outcomes to not only improve the delivery of IT services, but to reduce capital expenditure while diverting ongoing spending to operating expenses. In addition to more than 50 years of combined IT Services experiences at the executive level, we're among the top tier of Cloud service providers in the world with certifications and accolades that are second to none.
